

## Study Coordinator (80% -100%)

greenTEG provides the world's first sensor for non-invasive and continuous core body temperature sensing in wearable and med-tech applications. To get additional support within our wearable development team, we are looking for a study coordinator with a background in natural science to coordinate clinical and internal medical and sports studies.

As part of the R&D team, you will:

- Maintain and expand our scientific network
- Write proposals for customer projects and scientific grants e.g. clinical applications
- Plan, coordinate, and control external studies and scientific projects
- Plan, coordinate, and conduct internal studies
- Write scientific papers and case studies
- Be responsible for medical device certification

### Required

- University degree or similar in natural sciences or engineering
- Experience in coordination of clinical trials and the measurement of human vital parameters
- Scientific network in sports or medical science
- Good communication and networking skills
- Willingness to travel (meeting with project partners)
- Fluent in German and English (speaking and writing)
- A valid Swiss working permit

Please mention your reference projects in the application.

The position is available immediately.

### Welcome in our team!

We offer a collegial and striving work environment at the start-up center Technopark in Zurich. A motivated, dynamic and high-tech oriented team is looking forward to working with you.
