

«take the guesswork out of thermal monitoring»

Join the greenTEG team and advance with us – greenTEG offers high-tech thermal sensing solutions for an international customer base. We develop, manufacture, and market heat flux sensing solutions at our headquarters in Zurich. Since 2014 greenTEG has developed and continuously enhanced measurement instruments for building experts – particularly heat flux sensor-based U-value measurement devices. In 2018, greenTEG launched the first wireless multi-channel U-value and mold measurement device. For driving the global roll-out and significantly increasing sales numbers, while in the meantime also developing new features and application areas for customers, **we are seeking YOU**, to strengthen our team as an

Application Engineer gO Measurement System (80% -) 100% starting June 2019

Description

With your strong entrepreneurial mindset and a deep interest in technology and its applications, you will further develop greenTEG's business in the Building market. You are motivated to work for a young Swiss company which still operates like a startup in terms of hierarchies and decision making but is supported by stable business revenues from already existing products. You have good communication skills (in German as well as in English).

Key function and responsibilities

- Support customers in their product and project application related questions, incl. travelling to customer sides and fairs
- Identify, generate and close customer leads
- Take over global marketing activities (together with a colleague from Marketing), based on greenTEG's existing experience and new market insights you will gather
- Search & work on opportunities related to regulatory developments within the building insulation market
- Manage the cloud/CRM based tasks for setting up new customers/managing existing customer accounts

Qualifications

- Engineering degree (Fachhochschule or university)
- Work experience through internships e.g. in product management, sales and other fields
- Good communication skills, as well as a team-oriented character, e.g. you can work both independently and in small project teams, travel to customer sites & fairs and enjoy the interaction with new/potential customers
- Affinity to technology, especially good computer skills (MS Office, cloud-based systems)

Welcome to our team!

We offer a collegial and striving work environment in Zurich. Our high-tech company aims to motivate each one of us to maximum performance and personal development.

Interested? – Join us!

Send your application – motivational letter and CV – to hendrichs@greenTEG.com
