

EMITU DATA MONITORING PLATFORM FOR CORE

EMITU PLATFORM OFFERS A LOW-CODE AND
MODULAR APPROACH TO CUSTOM IOT SOLUTIONS
DEPLOYMENT, REDUCING TIME AND COSTS.

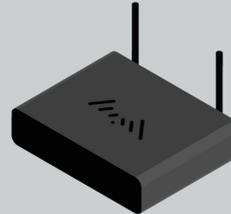

CORE IS THE FIRST CORE BODY TEMPERATURE SENSOR THAT
COMBINES ACCURACY WITH WEARABILITY.

Sensor

Gateway

Cloud Platform

EASY TO DEPLOY AND SCALE
WITH PLUG-AND-PLAY
DEVICES

We offer holistic IoT solutions to
provide live monitoring with a
'bird's eye view.'

OUR BENEFITS

- 01**  Long battery life more than 6 days
- 02**  Access from Any Device
- 03**  Bluetooth Low Energy
- 04**  AI Algorithm
- 05**  Unmatched Accuracy
- 06**  Patch or Belt Application
- 07**  Comfortable
- 08**  Easy to Use

WHY EMITU PLATFORM WITH CORE SENSOR FOR WORKFORCE SAFETY?

Until now, safety measures relied on indirect methods to prevent heat stress from occurring, such as monitoring the environmental conditions and creating protocols aimed at protecting workers in advance.

Risks related to Heat Stress during work hours occur especially for:

Oil rigs

Deep mining

Steel Mill/Manufacturing

Firefighters

Construction

With CORE, individual health monitoring becomes affordable, continuous and non-invasive with great accuracy.

Get early warnings of elevated temperature for personalized workforce protection

Monitor dozens of workers simultaneously with our cloud solutions

Improve Workforce Safety Protocols with real, up-to-date data about your workers

Gain additional insights about the performance of workers in extreme environments

WITH REAL-TIME MONITORING

[DANGER]
Body temperature reached 38.7°

Body temperature reached 38.7°

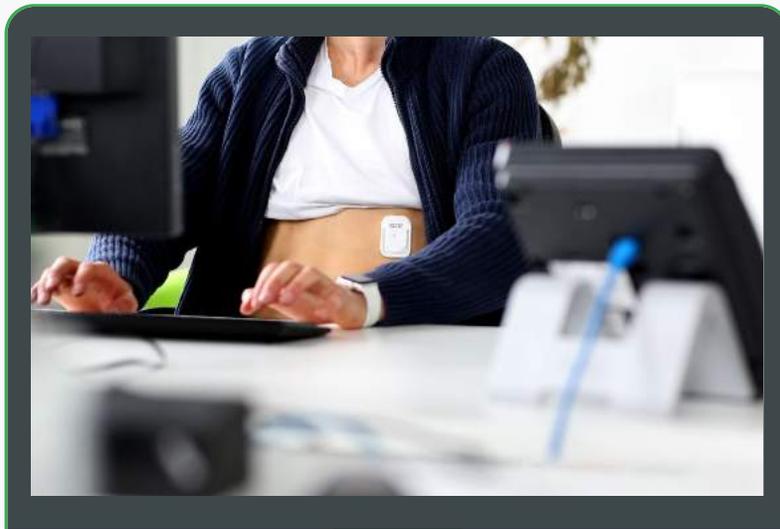

COMBINING CORE ACCURACY WITH A STATE-OF-THE-ART PLATFORM

@2022 Emitu and greenTEG

JOIN OUR JOURNEY

greenTEG developed the world's first core body temperature monitor for continuous and non-invasive measurements.

Emitu is an innovative deep-tech company in the IoT landscape. The partnership between GreenTEG and Emitu creates a synergy that provides an easy-to-use and quick-to-implement solution.
